

Foodi | Week 80 Leadership Brief

Decision request: Expand Foodi to 3 additional Dhaka zones next week, or pause expansion for 2 weeks to fix reliability and cancellations first?

Recommendation: Hold expansion for 2 weeks to see if cancellation rates stabilize at <11%; prioritizing sustainable reliability and unit economics over short-term volume.

Relevant KPIs

Overall Cancellation Rates (Outcome)	Repeat Customer Rate_7days (Outcome)	Contribution Margin per Order (Guardrail)
12.10%	65.06%	- BDT 64.28
Restaurant Prep Friction (Input)	Rider Supply Index (Input)	Tracking Coverage (Integrity)
9.70%	0.93	93.79%

Snapshot Mini-Table (Week 79 vs Week 80)

Metrics	Week 79	Week 80	Deltas
Overall Cancellation Rates	15.85%	12.10%	-3.75 pp (23.66% ▼)
Contribution Margin (BDT)	(2,200,618.71)	(2,264,409.39)	(63,790.68) 2.90% ▼
On-Time Delivery Rate	70.50%	75.30%	+4.80 pp (6.81% ▲)
Active Customers	52,693	55,988	+3,295 (6.25% ▲)
Support Tickets (per 1K Orders)	7.21	6.20	-1.01 (14.01% ▼)

Why This Action?

1. Zone Instability: Critical failure rates persist in **Old Dhaka (15.7%)** and **Badda-Rampura (14.5%)**; Badda faces confirmed bottlenecks (Rider Shortage + Kitchen Prep Issues), while Old Dhaka requires immediate root-cause diagnosis before scaling.

2. The Cost of Reliability: Unit economics inversely correlated with operational performance. The current path of achieving reliability is financially unsustainable (CM crashed to -65 BDT/order to achieve the 12% cancellation rate).

What Could Make This Wrong? Data Integrity Blindspot

Absence of 17,000 zone wise cancellation data points (an ~8% **reconciliation gap**) may hide critical bottlenecks in stable zones and undermine the targeted fix plan.

Supporting Evidence

Exhibit 1: Overall Cancellation Rate Just Dropped, Yet to Stabilize

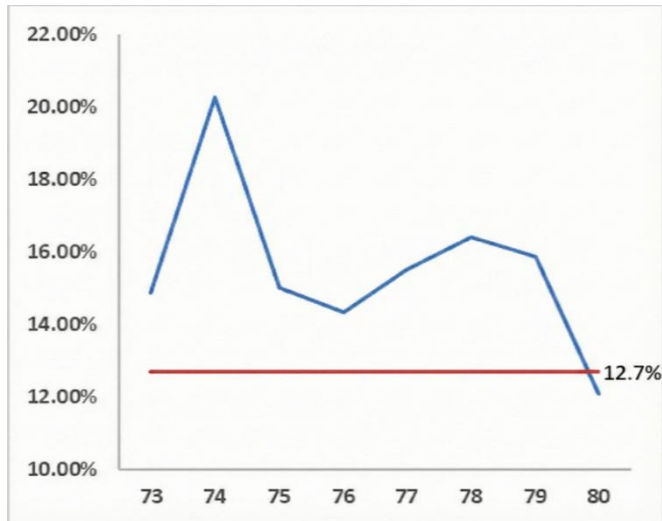

Exhibit-2: Reliability Achieved Only Through Unsustainable Margins

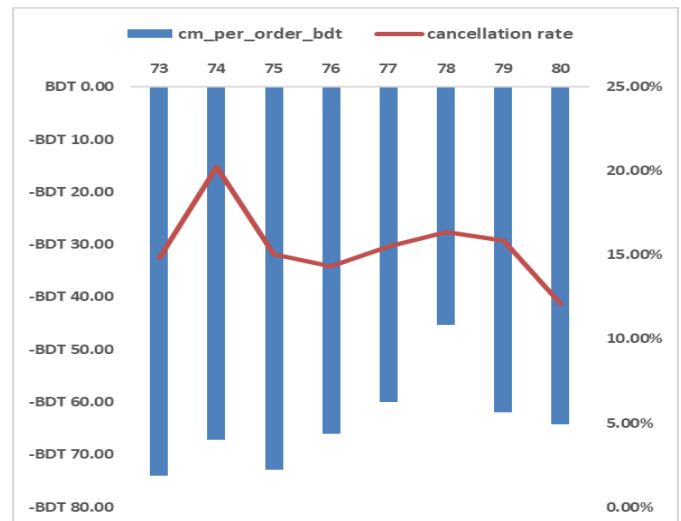

Exhibit-3: Averages Mask Critical Cancellation Hotspots in Badda-Rampura & Old Dhaka

	Cancellation Rate	On-Time Rate	Restaurant Prep Issues	Rider Supply Index
Badda-Rampura	14.51%	68.00%	11.75%	0.758144791
Dhanmondi	10.64%	76.85%	11.80%	1.06695931
Gulshan-Banani	9.91%	80.80%	10.30%	0.795024133
Mirpur	11.49%	72.53%	5.52%	0.882266654
Mohammadpur	11.73%	73.56%	11.93%	0.944467237
Old Dhaka	15.73%	68.00%	7.67%	0.997420165
Uttara	11.12%	76.94%	8.93%	1.035138125

Next Week Monitoring Plan

Metrics	Triggers	Action if Triggered
Overall Cancellation Rates	>12%	Continue to halt all further expansion efforts
Zone wise Restaurant Prep Issue Rate	>10%	Temporarily hide the worst 10% of restaurants in affected zones during peak hours to reduce rider wait-times and cancellations
Rider Supply Index in Badda and Gulshan zones	<80%	Reduce delivery radius to shed long-distance load; sacrificing volume to increase fleet availability and protect core-zone reliability
Zone wise CM per Order	(BDT 65)	Cap rider incentives & pause consumer promos in high-loss zones
